INDEPENDENT AUDITORS' REPORT

10 New England Business Center Dr. • Suite 107 Andover, MA 01810 (978)749-0005 melansonheath.com

To the Board of Selectmen
Town of Framingham, Massachusetts

Additional Offices: Nashua, NH Manchester, NH Greenfield, MA Ellsworth, ME

Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the Town of Framingham, Massachusetts, as of and for the year ended June 30, 2015 (except for the Framingham Contributory Retirement System which is as of and for the year ended December 31, 2014), and the related notes to the financial statements, which collectively comprise the Town's basic financial statements as listed in the Table of Contents.

Management's Responsibility for the Financial Statements

The Town's management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and

fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the Town of Framingham, as of June 30, 2015 (except for the Framingham Contributory Retirement System which is as of and for the year ended December 31, 2014), and the respective changes in financial position and, where applicable, cash flows thereof and the respective budgetary comparison for the general fund for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that Management's Discussion and Analysis, the Schedule of Funding Progress, the Schedule of Proportionate Share of Net Pension Liability, the Schedule of Contributions, the Schedule of Changes in Net Pension Liability, and the Schedules of Net Pension Liability, Contributions, and Investment Returns be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with evidence sufficient to express an opinion or provide any assurance.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated March 7, 2016 on our consideration of the Town's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Town's internal control over financial reporting and compliance.

Melanson Heath

MANAGEMENT'S DISCUSSION AND ANALYSIS

As management of the Town of Framingham, we offer readers this narrative overview and analysis of the financial activities of the Town of Framingham for the fiscal year ended June 30, 2015. Unless otherwise noted, all amounts reported in this analysis are expressed in thousands.

A. OVERVIEW OF THE FINANCIAL STATEMENTS

This discussion and analysis is intended to serve as an introduction to the basic financial statements. The basic financial statements are comprised of three components: (1) government-wide financial statements, (2) fund financial statements, and (3) notes to financial statements. This report also contains other supplementary information in addition to the basic financial statements themselves.

<u>Government-wide financial statements</u>. The government-wide financial statements are designed to provide readers with a broad overview of our finances in a manner similar to a private-sector business.

The Statement of Net Position presents information on all assets and liabilities, with the difference between the two reported as net position. Over time, increases or decreases in net position may serve as a useful indicator of whether the financial position is improving or deteriorating.

The Statement of Activities presents information showing how the government's net position changed during the most recent fiscal year. All changes in net position are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing of related cash flows. Thus, revenues and expenses are reported in this statement for some items that will only result in cash flows in future fiscal periods (e.g., uncollected taxes and earned but unused vacation leave).

Both of the government-wide financial statements distinguish functions that are principally supported by taxes and intergovernmental revenues (governmental activities) from other functions that are intended to recover all or a significant portion of their costs through user fees and charges (business-type activities). The governmental activities include general government, public safety, education, public works, health and human services, and culture and recreation. The business-type activities include water and sewer activities.

<u>Fund financial statements</u>. A fund is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. Fund accounting is used to ensure and demonstrate compliance with finance-related legal requirements. All of the funds can be divided into three categories: governmental funds, proprietary funds and fiduciary funds.

<u>Governmental funds</u>. Governmental funds are used to account for essentially the same functions reported as governmental activities in the government-wide

financial statements. However, unlike the government-wide financial statements, governmental fund financial statements focus on near-term inflows and outflows of spendable resources, as well as on balances of spendable resources available at the end of the fiscal year. Such information may be useful in evaluating a government's near-term financing requirements.

Because the focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented for governmental funds with similar information presented for governmental activities in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the government's near-term financing decisions. Both the governmental fund balance sheet and the governmental fund statement of revenues, expenditures and changes in fund balances provide a reconciliation to facilitate this comparison between governmental funds and governmental activities.

An annual appropriated budget is adopted for the general fund. A budgetary comparison statement has been provided for the general fund to demonstrate compliance with this budget.

Proprietary funds. Proprietary funds are maintained as follows:

Enterprise funds are used to report the same functions presented as businesstype activities in the government-wide financial statements. Specifically, enterprise funds are used to account for water and sewer operations.

Internal service funds are an accounting device used to accumulate and allocate costs internally among various functions. Specifically, internal service funds are used to account for self-insured employee health programs. Because these services predominantly benefit governmental rather than business-type functions, they have been included within governmental activities in the government-wide financial statements. The Town converted from a self-insurance program to a premium-based program through GIC insurance for fiscal year 2015.

Proprietary funds provide the same type of information as the business-type activities reported in the government-wide financial statements, only in more detail. The proprietary fund financial statements provide separate information for the water and sewer operations, both of which are considered to be major funds.

<u>Fiduciary funds</u>. Fiduciary funds are used to account for resources held for the benefit of parties outside the government. Fiduciary funds are not reflected in the government-wide financial statements because the resources of those funds are not available to support the Town's own programs. The accounting used for fiduciary funds is much like that used for proprietary funds.

<u>Notes to financial statements</u>. The notes provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements.

<u>Other information</u>. In addition to the basic financial statements and accompanying notes, this report also presents certain required supplementary information which is required to be disclosed by accounting principles generally accepted in the United States of America.

B. FINANCIAL HIGHLIGHTS

- As of the close of the current fiscal year, the total of assets exceeded liabilities by \$84,667,667 (i.e., net position), a change of \$614,519 in comparison to the prior year.
- As of the close of the current fiscal year, governmental funds reported combined ending fund balances of \$35,785,791, a change of \$(2,395,960) in comparison to the prior year.
- At the end of the current fiscal year, unassigned fund balance for the general fund was \$20,971,228, a change of \$(3,293,018)in comparison to the prior year, while committed fund balance was \$8,645,420, a change of \$6,466,106 in comparison to the prior year.
- Total bonds payable at the close of the current fiscal year was \$179,228,471, a change of \$11,953,924 in comparison to the prior year. The Town also had \$40,556,882 in bond anticipation notes outstanding at year-end.

C. GOVERNMENT-WIDE FINANCIAL ANALYSIS

The following is a summary of condensed government-wide financial data for the current and prior fiscal years (in thousands).

| Net position - end of year | 12,595 | \$ | 100,629 | \$_ | 72,073 | \$_ | 74,147 | \$ | 84,668 | \$ | 174,776 |

CHANGES IN NET BOSITION

As noted earlier, net position may serve over time as a useful indicator of a government's financial position. At the close of the most recent fiscal year, total net position was \$84,667,667, a change of \$614,519 from the prior year.

The largest portion of net position, \$194,095,667 reflects our investment in capital assets (e.g., land, construction in progress, buildings and improvements, vehicles, machinery, equipment, and infrastructure); less any related debt used to acquire those assets that are still outstanding. These capital assets are used to provide

services to citizens; consequently, these assets are not available for future spending. Although the investment in capital assets is reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources, since the capital assets themselves cannot be used to liquidate these liabilities.

An additional portion of net position, \$12,966,137 represents resources that are subject to external restrictions on how they may be used. The remaining balance of unrestricted net position deficit of \$(122,394,137) primarily results from the Town's unfunded net pension and OPEB liabilities.

<u>Governmental activities</u>. Governmental activities for the year resulted in a change in net position of \$829,402. Key elements of this change are as follows (in thousands):

| Excess of revenues over (under) expenditures: General fund Internal service fund General fund transfers from enterprise funds, net | \$ | 1,764 287 2,888 |
|---|-----|------------------------------------|
| Subtotal | | 4,939 |
| Capital assets acquired with current year capital grants Increase in net OPEB obligation Decrease in net pension liability Other | _ | 1,405 (9,256) 2,510 1,231 |
| Total | \$_ | 829 |

<u>Business-type activities</u>. Business-type activities for the year resulted in a change in net position of \$(214,883). Key elements of this change are as follows (in thousands):

| Water operations | \$ | 1,226 |
|------------------|-----------------|---------|
| Sewer operations | - | (1,441) |
| Total | \$ __ | (215) |

The reduction in the net position primarily results from current year depreciation (not funded in the rates) exceeding long-term debt principal payments (funded in the rates).

D. FINANCIAL ANALYSIS OF THE GOVERNMENT'S FUNDS

As noted earlier, fund accounting is used to ensure and demonstrate compliance with finance-related legal requirements.

Governmental funds. The focus of governmental funds is to provide information on near-term inflows, outflows and balances of spendable resources. Such information is useful in assessing financing requirements. In particular, unassigned fund balance may serve as a useful measure of a government's net resources available for spending at the end of the fiscal year.

As of the end of the current fiscal year, governmental funds reported combined ending fund balances of \$35,785,791, a change of \$(2,395,960) in comparison to the prior year.

The general fund is the chief operating fund. At the end of the current fiscal year, unassigned fund balance of the general fund was \$20,971,228 (including \$13,585,084 of general stabilization funds), while total fund balance was \$36,456,820. As a measure of the general fund's liquidity, it may be useful to compare both unassigned fund balance and total fund balance to total general fund expenditures. Refer to the table below (in thousands).

| | | | | % of |
|-------------------------|--------------|--------------|---------------|-------------------|
| | | | | Total General |
| General Fund | 6/30/15 | 6/30/14 | <u>Change</u> | Fund Expenditures |
| Unassigned fund balance | \$ 20,971 | \$ 24,264 | \$ (3,293) | 8.8% |
| Total fund balance | \$ 36,457 | \$ 32,093 | \$ 4,364 | 15.2% |

The total fund balance of the general fund changed by \$4,363,374 during the current fiscal year. Key factors in this change are as follows (in thousands):

| | | General | Open Space | Capital | | General |
|--|---|----------------------------|---------------------|------------------------------|---------------------|---|
| General Fund Highlights | <u>Operating</u> | <u>Stabilization</u> | Stabilization | Stabilization | Conservation | <u>Fund</u> |
| Use of other funding sources, net of transfers to stabilization Revenues in excess of budget Expenditures less than budget Raising of prior year snow and ice deficit Tax collections more than levy Expenditures of prior year encumbrances | \$ (4,547) 3,272 4,181 220 21 | \$ 640 - - - - | \$ - - - - | \$ 2,284 - - - - | \$ - - - - | \$ (1,623) 3,272 4,181 220 21 |
| in excess of current year encumbrances Transfer to capital project fund Other | (1,246) - (590) | - - 211 | (275) 31 | - - 159 | - - 2 | (1,246) (275) (187) |
| Total | \$ 1,311 | \$ 851 | \$ (244) | \$ 2,443 | \$2 | \$ 4,363 |

Included in the total general fund balance are the Town's stabilization and conservation accounts with the following balances (in thousands):

| | | <u>6/30/15</u> | | <u>6/30/14</u> | <u>Change</u> |
|--------------------------|-----|----------------|-----|----------------|---------------|
| General stabilization | \$ | 13,585 | \$ | 12,734 | \$ 851 |
| Open space stabilization | | 140 | | 384 | (244) |
| Capital stablization | | 2,443 | | - | 2,443 |
| Conservation | _ | 71 | _ | 69 | 2 |
| Total | \$_ | 16,239 | \$_ | 13,187 | \$ 3,052 |

<u>Proprietary funds</u>. Proprietary funds provide the same type of information found in the business-type activities reported in the government-wide financial statements, but in more detail.

Unrestricted net position of the enterprise funds at the end of the year amounted to \$15,076,160, a decrease of \$(86,142) from the prior year, mainly as a result of current year depreciation expense in excess of paydowns on bonds. Other factors concerning the finances of proprietary funds have already been addressed in the entity-wide discussion of business-type activities.

E. GENERAL FUND BUDGETARY HIGHLIGHTS

Differences between the original budget and the final amended budget resulted in an overall change in appropriations of \$715,009, due to a change in general government of \$5,764 and education of \$709,245. The additional appropriations were funded by free cash and transfers from other funds.

Revenues in excess of budget mainly consist of building permits, Medicaid reimbursements, and mitigation general fund revenues.

F. CAPITAL ASSET AND DEBT ADMINISTRATION

<u>Capital assets</u>. Total investment in capital assets for governmental and business-type activities at year-end, amounted to \$406,926,209 (net of accumulated depreciation), a change of \$15,196,375 from the prior year. This investment in capital assets includes land, construction in progress, buildings and improvements, vehicles, machinery, equipment, and infrastructure.

The following is a summary of capital assets for the current year and prior fiscal year (in thousands):

CAPITAL ASSETS (net of depreciation) June 30, 2015 and 2014

| | Governmental <u>Activities</u> | | | | | ess tivit | -Type <u>ies</u> | <u>Total</u> | | | |

Significant capital asset activity for fiscal year 2015 included:

- Design for Wastewater Pumping Stations projects, appropriated for \$8,009, started in the fall of 2007 and \$7,110 has been expended.
- At the 2008 Annual Town Meeting, the Town authorized over \$21,000 in water capital projects and \$9,000 in sewer capital projects. \$2,134 has been expended on Grove Street water pump station appropriated for \$2,932. In addition, \$2,210 and \$2,296 has been expended on the Prospect Street area water and sewer main replacement projects, originally appropriated for \$3,000 and \$2,783 respectfully.
- At the 2009 Annual Town Meeting, \$40,337 was an appropriated to construct the Birch Road water treatment center. The project proposes to re-activate the Birch Road wells which are located in the northeast corner of Framingham. The project will provide the Town with an independent and dependable source of drinking water. The Town has been working with the United States Geological Survey (USGS) to refine a sophisticated groundwater model. The Town had previously appropriated \$5,530. In total, \$7,439 has been expended on studies and design on this project.
- To comply with the Administrative Consent Order issued by the Department of Environmental Protection and Settlement Agreement with the Massachusetts Water Resources Authority, \$40,407 was voted to reconfigure the sewer system in East Framingham. This project has been approved for \$38,066 in loans from Clean Water State Revolving Fund loan program for which \$34,814 has been issued which includes \$4,461 of ARRA funding. To date, \$40,355 has been expended on Phase I.
- At the 2010 Annual Town Meeting, \$17,967 was voted for additional water capital projects. Currently, \$4,728 has been expended from the \$9,619 appropriated for North Concord Street water mains project. Further, \$5,901 has been expended from the \$6,263 appropriation for Grant and Pond Streets project.

Design of the Goodnow Pump Station authorized for \$1,385 was started in May. In addition, \$7,402 was appropriated for sewer projects of which \$6,552 was for sewer lines in the Grant and Pond Street area. At year-end, \$4,158 has been expended on this project.

- At the 2011 Annual Town Meeting, \$2,680 and \$1,765 was authorized for the Downtown water and sewer utilities, and at year-end, \$1,157 and \$943 was expended, respectively. In addition, \$5,587 has been expended from the \$6,310 authorized for the North Framingham project and the Worcester Road pump stations appropriated for \$1,925 has had \$1,229 of expenditures.
- At the 2012 Annual Town Meeting, Water and sewer improvements at the intersections of Irving, Loring, and Herbert Streets appropriated at \$1,795 and \$2,475 started and \$940 and \$1,760 have been expended, respectively. \$2,586 was expended from the \$3,214 appropriation for Beebe water storage tanks; and \$2,278 was expended on the \$2,400 appropriation for East Framingham sewer improvements and Central Street Siphon Sudbury River projects.
- At a Spring 2013 Special Town Meeting, the Town authorized \$7,988 for the construction of the Christa McAuliffe Branch Library. These funds are in addition to the \$710 for a land purchase approved in January. A grant of \$4,186 was received from the Massachusetts Board of Library Commissioners to fund a portion of the project. The land was purchased for \$709 and \$3,792 has been incurred on architectural and related expenses. The branch is expected to open in February 2016.
- At the 2013 Annual Town Meeting, \$12,265 was appropriated for a variety of Town capital and major equipment projects, the largest being \$3,200 for roadway improvements of which has been substantially completed. \$4,529 was appropriated for water capital and major equipment purchase of which \$2,990 was for the Warren Road and Prindiville water mains which has not started. \$25,630 was appropriated for sewer capital and major equipment purchases. Of the \$17,220 appropriated for the Worcester Road pump station elimination project, \$228 has been expended. Design costs of \$253 have been expended from the \$6,563 appropriation for the Baiting Road sewer improvements. \$557 has been expended on the \$1,240 appropriation for Bethany Road.
- At the 2014 Annual Town Meeting, \$14,867 was appropriated for a variety of Town capital and major equipment projects the largest being \$4,000 for roadway improvements of which \$3,628 has been expended. Of the \$1,000 appropriated for refuse collection bins and \$1,337 appropriated for automatic refuse packers to modernize the refuse collection operations, \$899 and \$1,131 has been expended, respectively. \$18,016 was appropriated for water capital and major equipment purchases. \$242 and \$316 has been expended on the design and initial construction of the \$3,325 appropriation for the Main Street area and \$12,145 for the Union Avenue area water mains. \$9,005 was appropriated for sewer capital and major equipment purchases including \$1,400 for the Waverly and Winthrop intersection realignment design and construction for which \$469 has been expended, \$1,880 appropriated for the Union Avenue

- sewer improvements for which \$88 was expended and \$1,585 appropriated for the Elmfield Road sewer improvements of which \$37 has been expended.
- At the 2015 Annual Town Meeting, \$19,523 was appropriated for a variety of Town capital and major equipment projects the largest being \$5,660 for renovations to the Loring Arena, \$4,500 for Roadway Improvements, \$1,155 for School Technology Upgrades, and \$1,207 for the Farley Building Repairs. \$10,291 was appropriated for Water capital and major equipment purchase of which \$3,160 for design and construction of the Evergreen Street area and \$3,980 for water main construction in the Speen Street and Cochituate Road area. \$16,596 was appropriated for Sewer capital and major equipment purchases including \$9,810 for design and construction of the Interchange 12 Railway Sewer alignment, \$1,100 for design of the Shawmut Terrace and John McQuinn Pump Stations and Woodland Force main improvements, \$1,245 for design of the Worcester Road area sewer improvements and \$1,410 for the design and construction of the Speen Street area force main abandonment.

Additional information on capital assets can be found in the Notes to Financial Statements.

<u>Long-term debt</u>. At the end of the current fiscal year, total bonded debt and bond anticipation notes outstanding was \$219,785,353, all of which was backed by the full faith and credit of the government.

The following is a summary of the Town's outstanding debt for the current and prior fiscal years (in thousands):

OUTSTANDING DEBT General Obligation Bonds and Bond Anticipation Notes June 30, 2015 and 2014

| | Governmental <u>Activities</u> | | | | i-Type i <u>ies</u> | <u>Total</u> | | | | |
|---|--------------------------------|-----------------|----|-------------------|------------------------|-------------------|----|-------------------|----|-------------------|
| | <u>2015</u> | <u>2014</u> | | <u>2015</u> | | <u>2014</u> | | <u>2015</u> | | <u>2014</u> |
| General obligation bonds Bond anticipation notes | \$ 53,832 \$ 12,744 | 55,871 7,817 | \$ | 125,396 27,813 | \$ | 111,403 41,009 | \$ | 179,228 40,557 | \$ | 167,274 48,826 |
| Total | \$ 66,576 \$ | 63,688 | \$ | 153,209 | \$ | 152,412 | \$ | 219,785 | \$ | 216,100 |

<u>Change in credit rating</u>. The Town of Framingham maintains an Aa2 rating from Moody's for general obligation debt.

State statutes limit the amount of general obligation debt a governmental entity may issue to 5% of its total assessed valuation. The current debt limitation is \$380,562, which is significantly in excess of outstanding general obligation debt.

Additional information on long-term debt can be found in the Notes to Financial Statements.

G. ECONOMIC FACTORS AND NEXT YEAR'S BUDGETS AND RATES

- The unadjusted unemployment rate for the Town of Framingham is currently 4.0% (June), which is down from the 4.5% rate from June 2014. This compares to the State's unemployment rate of 4.7% and the national rate of 5.3%
- Inflationary trends in the region compare favorably to national indices.
- The above factors were considered in preparing the Town of Framingham's budget for the 2016 fiscal year.
- During the current fiscal year, unassigned fund balance in the general fund decreased to \$20,971. In addition, the Town of Framingham has appropriated \$4,950 of "free cash' to finance the FY16 general fund operating budget of which \$200 for Stabilization and \$1,000 to a Capital Stabilization fund.
- In FY15, the Town transferred a net \$640 into the Stabilization fund, as well as, appropriated a transfer of \$200 for FY16. The Stabilization fund is currently maintained at 5% of the Town's operating budget. The Capital Stabilization fund established in FY15 had a balance of \$2,442.
- The \$11,465 of free cash certified by the Massachusetts Department of Revenue as of July 1, 2015 is available, subject to appropriation, to finance FY16 and FY17 expenditures.

RECONCILIATION OF THE STATEMENT OF REVENUES EXPENDITURES, AND CHANGES IN FUND BALANCES OF GOVERNMENTAL FUNDS TO THE STATEMENT OF ACTIVITIES

FOR THE YEAR ENDED JUNE 30, 2015

| Net changes in fund balances - Total governmental funds | \$ | (2,395,960) |
|--|--------|--------------|
| Governmental funds report capital outlays as expenditures. However, in the Statement of Activities the cost of those assets is allocated over their estimated useful lives and reported as depreciation expense: | | |
| Capital outlay purchases, net of disposals | | 22,570,004 |
| Depreciation | | (13,239,154) |
| Revenues in the Statement of Activities that do not provide current financial resources are fully deferred in the Statement of Revenues, Expenditures and Changes in Fund Balances. Therefore, the recognition of revenue for various types of accounts receivable (i.e., real estate and personal property, motor vehicle excise, etc.) differ between the two statements. This amount represents the net change in deferred revenue. | | 1,224,788 |
| Some revenues reported in the Statement of Activities, such as MSBA reimbursements for contracted assistance, do not provide current financial resources and therefore, are not reported as revenues in the governmental funds. | | (2,510,995) |
| The issuance of long-term debt (e.g., bonds and leases) provides current financial resources to governmental funds, while the repayment of the principal of long-term debt consumes the financial resources of governmental funds. Neither transaction, however, has any effect on net position: | | |
| Proceeds from debt | | (7,270,120) |
| Repayments of debt | | 9,308,618 |
| Change in deferred debt amortization | | (59,817) |
| In the Statement of Activities, interest is accrued on outstanding long-term debt, whereas in governmental funds interest is not reported until due. | | 244,980 |
| Some expenses reported in the Statement of Activities, do not require the use of current financial resources and therefore, are not reported as expenditures in the governmental funds: | | |
| Increase in liability for compensated absences | | (108,231) |
| Increase in net OPEB obligation | | (9,255,724) |
| Decrease in net pension liability, net of deferred outflows | | 2,510,459 |
| Increase in bond premium amortization | | (476,729) |
| Internal service funds are used by management to account for health insurance and workers' compensation activities. The net activity of internal service funds is reported with Governmental Activities. | | 287,283 |
| | ф — | |
| Change in net position of governmental activities | \$_ | 829,402 |

Notes to Financial Statements

1. Summary of Significant Accounting Policies

The accounting policies of the Town of Framingham (the Town) conform to generally accepted accounting principles (GAAP) as applicable to governmental units. The following is a summary of the more significant policies:

A. Reporting Entity

The government is a municipal corporation governed by an elected Board of Selectmen. As required by generally accepted accounting principles, these financial statements present the government and applicable component units for which the government is considered to be financially accountable. In fiscal year 2014, it was determined that no entities met the required GASB 14 (as amended) criteria of component units.

In the Fiduciary Funds: The Framingham Contributory Retirement System which was established to provide retirement benefits primarily to employees and their beneficiaries. The System is presented using the accrual basis of accounting and is reported as a pension trust fund in the fiduciary fund financial statements. Additional financial information of the System can be obtained by contacting the System located at 150 Concord Street, Framingham, MA 01702.

B. Government-wide and Fund Financial Statements

Government-wide Financial Statements

The government-wide financial statements (i.e., the Statement of Net Position and the Statement of Activities) report information on all of the nonfiduciary activities of the primary government. For the most part, the effect of interfund activity has been removed from these statements. Governmental activities, which normally are supported by taxes and intergovernmental revenues, are reported separately from business-type activities, which rely to a significant extent on fees and charges for support. Likewise, the primary government is reported separately from certain legally separate component units for which the primary government is financially accountable.

The Statement of Activities demonstrates the degree to which the direct expenses of a given function or segment is offset by program revenues. *Direct expenses* are those that are clearly identifiable with a specific function or segment. Program revenues include (1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function or segment and (2) grants and

contributions that are restricted to meeting the operational or capital requirements of a particular function or segment. Taxes and other items not properly included among program revenues are reported instead as *general revenues*.

Fund Financial Statements

Separate financial statements are provided for governmental funds, proprietary funds and fiduciary funds, even though the latter are excluded from the government-wide financial statements. Major individual governmental funds and major individual enterprise funds are reported as separate columns in the fund financial statements.

C. <u>Measurement Focus</u>, <u>Basis of Accounting</u>, <u>and Financial Statement</u> Presentation

Government-wide Financial Statements

The government-wide financial statements are reported using the *economic* resources measurement focus and the accrual basis of accounting, as is the proprietary fund and fiduciary fund financial statements. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met. As a general rule, the effect of interfund activity has been eliminated from the government- wide financial statements.

Amounts reported as *program revenues* include (1) charges to customers or applicants for goods, services, or privileges provided, (2) operating grants and contributions, and (3) capital grants and contributions, including special assessments. Internally dedicated resources are reported as *general revenues* rather than as program revenues. Likewise, general revenues include all taxes and excises.

Fund Financial Statements

Governmental fund financial statements are reported using the *current* financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the government considers property tax revenues to be available if they are collected within 60 days of the end of the current fiscal period. All other revenue items are considered to be measurable and available only when cash is received by the government. Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, debt service expenditures, as well as expenditures related to compensated absences and claims and judgments, are recorded only when payment is due.

The government reports the following major governmental funds:

• The *general fund* is the government's primary operating fund. It accounts for all financial resources of the general government, except those required to be accounted for in another fund.

Proprietary funds distinguish operating revenues and expenses from nonoperating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations. The principal operating revenues of the enterprise fund are charges to customers for sales and services. Operating expenses for enterprise funds include the cost of sales and services, administrative expenses and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as nonoperating revenues and expenses.

The government reports the following major proprietary funds:

- The water fund is used to report the Town's water enterprise fund operations.
- The sewer fund is used to report the Town's sewer enterprise fund operations.

The self-insured employee health program, reported as an *internal service* fund in the accompanying financial statements, was converted from a self-insurance program to the GIC insurance plan starting in fiscal year 2015. The remaining balance in the fund is to pay unanticipated run-off claims.

The Other Post-employment Trust fund is used to accumulate resources for health and life insurance benefits for retired employees.

The *pension trust fund* accounts for the activities of the Employees Contributory Retirement System, which accumulates resources for pension benefit payments to qualified employees.

The agency fund is custodial in nature and is used to account for funds held for others. Agency funds report only assets and liabilities, and thus have no measurement focus.

D. Cash and Short-Term Investments

Cash balances from all funds, except those required to be segregated by law, are combined to form a consolidation of cash. Cash balances are invested to the extent available, and interest earnings are recognized in the General Fund. Certain special revenue, proprietary, and fiduciary funds segregate cash, and investment earnings become a part of those funds.

Deposits with financial institutions consist primarily of demand deposits, certificates of deposits, and savings accounts. A cash and investment pool is maintained that is available for use by all funds. Each fund's portion of this pool is reflected on the combined financial statements under the caption "cash and short-term investments". The interest earnings attributable to each fund type were included under investment income.

For purpose of the Statement of Cash Flows, the proprietary funds consider investments with original maturities of three months or less to be short-term investments.

E. <u>Investments</u>

State and local statutes place certain limitations on the nature of deposits and investments available. Deposits in any financial institution may not exceed certain levels within the financial institution. Non-fiduciary fund investments can be made in securities issued by or unconditionally guaranteed by the U.S. Government or agencies that have a maturity of one year or less from the date of purchase and repurchase agreements guaranteed by such securities with maturity dates of no more than 90 days from the date of purchase.

Investments for the Contributory Retirement System are fully invested in the Commonwealth's Pension Reserve Investment Trust, and are carried at fair value.

F. Property Tax Limitations

Legislation known as "Proposition 2½" has limited the amount of revenue that can be derived from property taxes. The prior fiscal year's tax levy limit is used as a base and cannot increase by more than 2.5 percent (excluding new growth), unless an override is voted. The actual fiscal year 2015 tax levy reflected an excess capacity of \$5,501.554.

G. Inventories

Inventories are valued at cost using the first-in/first-out (FIFO) method. The costs of governmental fund-type inventories are recorded as expenditures when purchased rather than when consumed. No significant inventory balances were on hand in governmental funds.

H. Capital Assets

Capital assets, which include property, plant, equipment, and infrastructure assets are reported in the applicable governmental or businesstype activities columns in the government-wide financial statements. Capital assets are defined by the government as assets with an initial individual cost of more than \$5,000 and an estimated useful life in excess of two years. Such assets are recorded at historical cost or estimated historical cost if purchased or constructed. Donated capital assets are recorded at estimated fair market value at the date of donation.

The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend assets lives are not capitalized.

Major outlays for capital assets and improvements are capitalized as projects are constructed. Interest incurred during the construction phase of capital assets of business-type activities is included as part of the capitalized value of the assets constructed.

Property, plant, equipment, and infrastructure of the primary government, as well as the component units, are depreciated using the straight-line method over the following estimated useful lives:

| <u>Assets</u> | <u>Years</u> |
|--------------------------------------|--------------|
| Buildings | 40 |
| Building improvements | 7 - 20 |
| Infrastructure | 50 - 100 |
| Vehicles | 5 - 10 |
| Machinery, equipment and furnishings | 5 - 10 |
| Computer equipment | 5 |

I. Compensated Absences

It is the government's policy to permit employees to accumulate earned but unused vacation and sick pay benefits. All vested sick and vacation pay is accrued when incurred in the government-wide, proprietary, and fiduciary fund financial statements. A liability for these amounts is reported in governmental funds only if they have matured, for example, as a result of employee resignations and retirements.

J. Long-Term Obligations

In the government-wide financial statements, and proprietary fund types in the fund financial statements, long-term debt, and other long-term obligations are reported as liabilities in the applicable governmental activities, business-type activities, or proprietary fund type Statement of Net Position.

K. Fund Equity

Fund equity at the governmental fund financial reporting level is classified as "fund balance". Fund equity for all other reporting is classified as "net position".

<u>Fund Balance</u> - Generally, fund balance represents the difference between the current assets and current liabilities. The Town reserves those portions of fund balance that are legally segregated for a specific

future use or which do not represent available, spendable resources and therefore, are not available for appropriation or expenditure. Unassigned fund balance indicates that portion of fund balance that is available for appropriation in future periods.

The Town's fund balance classification policies and procedures are as follows:

- 1) Nonspendable funds are either unspendable in the current form (i.e., inventory, petty cash, or prepaid items) or can never be spent (i.e., perpetual care).
- 2) Restricted funds are used solely for the purpose in which the fund was established. In the case of special revenue funds, these funds are created by statute or otherwise have external constraints on how the funds can be expended.
- 3) <u>Committed funds</u> are reported and expended as a result of motions passed by the highest decision making authority in the government (i.e., Town Meeting).
- 4) Assigned funds are used for specific purposes as established by management. These funds, which include encumbrances, have been assigned for specific goods and services ordered but not yet paid for. This account also includes fund balance voted to be used in the subsequent fiscal year.
- 5) <u>Unassigned funds</u> are available to be spent in future periods.

When an expenditure is incurred that would qualify for payment from multiple fund balance types, the Town uses the following order to liquidate liabilities: restricted, committed, assigned, and unassigned.

<u>Net Position</u> - Net position represents the difference between assets/ deferred outflows and liabilities/deferred inflows. Net investment in capital assets, net of related debt, consist of capital assets, net of accumulated depreciation, reduced by the outstanding balances of any borrowing used for the acquisition, construction or improvement of those assets. Net position is reported as restricted when there are limitations imposed on their use either through the enabling legislation adopted by the Town or through external restrictions imposed by creditors, grantors, or laws or regulations of other governments. The remaining net position is reported as unrestricted.

L. Use of Estimates

The preparation of basic financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures for contingent assets and liabilities at the date of the basic financial statements, and the reported amounts of the revenues and

expenditures/expenses during the fiscal year. Actual results could vary from estimates that were used.

2. Stewardship, Compliance, and Accountability

A. Budgetary Information

At the annual town meeting, the Chief Financial Officer presents an operating and capital budget for the proposed expenditures of the fiscal year commencing the following July 1. The budget, as enacted by town meeting, establishes the legal level of control and specifies that certain appropriations are to be funded by particular revenues. The original budget is amended during the fiscal year at special town meetings as required by changing conditions. In cases of extraordinary or unforeseen expenses, the Finance Committee is empowered to transfer funds from the Reserve Fund (a contingency appropriation) to a departmental appropriation. "Extraordinary" includes expenses which are not in the usual line, or are great or exceptional. "Unforeseen" includes expenses which are not foreseen as of the time of the annual meeting when appropriations are voted.

Departments are limited to the line items as voted. Certain items may exceed the line item budget as approved if it is for an emergency and for the safety of the general public. These items are limited by the Massachusetts General Laws and must be raised in the next year's tax rate.

Formal budgetary integration is employed as a management control device during the year for the General Fund and Proprietary Funds. Effective budgetary control is achieved for all other funds through provisions of the Massachusetts General Laws.

At year-end, appropriation balances lapse, except for certain unexpended capital items and encumbrances which will be honored during the subsequent year.

B. Budgetary Basis

The General Fund final appropriation appearing on the "Budget and Actual" page of the fund financial statements represents the final amended budget after all reserve fund transfers and supplemental appropriations.

C. <u>Budget/GAAP Reconciliation</u>

The budgetary data for the general and proprietary funds is based upon accounting principles that differ from generally accepted accounting principles (GAAP). Therefore, in addition to the GAAP basis financial statements, the results of operations of the general fund are presented in accordance with budgetary accounting principles to provide a meaningful comparison to budgetary data.

The following is a summary of adjustments made to the actual revenues and other sources, and expenditures and other uses, to conform to the budgetary basis of accounting.

| | | Revenues | Expenditures | | | | |
|---|-----------|-----------------|----------------|-------------|--|--|--|
| | | and Other | | and Other | | | |
| General Fund | <u>Fi</u> | nancing Sources | Financing Uses | | | | |

3. Cash and Short-Term Investments

Custodial Credit Risk - Deposits. Custodial credit risk is the risk that in the event of a bank failure, the Town's and Contributory Retirement System's (the System) deposits may not be returned. Massachusetts General Law Chapter 44, Section 55, limits the Town's deposits "in a bank or trust company or banking company to an amount not exceeding sixty percent of the capital and surplus of such bank or trust company or banking company, unless satisfactory security is given to it by such bank or trust company or banking company for such excess." The Town's deposit policy for custodial credit risk is to limit unsecured bank deposits to no more than 5% of the institution's assets and no more than 10% of the municipality's cash.

Massachusetts General Law Chapter 32, Section 23, limits the System's deposits "in a bank or trust company to an amount not exceeding ten percent of the capital and surplus of such bank or trust company." The System does not have a deposit policy for custodial credit risk.

As of June 30, 2015 and December 31, 2014, \$22,067,235 and \$7,928,955 of the Town's and System's bank balances of \$79,085,810 and \$12,274,937 respectively, was exposed to custodial credit risk as uninsured or uncollateralized.

Of the Town's balance exposed to custodial credit risk, \$17,393,114 is on deposit with Massachusetts Municipal Depository Trust.

Of the System's balance exposed to custodial credit risk, \$2,100,000 is on deposit with the Pension Reserve Investment Trust and \$5,828,955 is on deposit with Massachusetts Municipal Depository Trust.

4. Investments

A. Credit Risk

Generally, credit risk is the risk that an issuer of an investment will not fulfill its obligation to the holder of the investment. For short-term investments that were purchased using surplus revenues, Massachusetts General Law, Chapter 44, Section 55, limits the Town's investments to the top rating issued by at least one nationally recognized statistical rating organization (NRSROs).

Presented below (in thousands) is the actual rating as of year-end for each investment of the Town. (All federal agency securities have an implied credit rating of AAA):

| | | | _ | Rating as of Year-end | | | | | | |
|---------------------------|-----|--------------|----|-----------------------|----|-----------|----|--------|--|--|
| | | Fair | | | | | | Not | | |
| Investment Type | | <u>Value</u> | | <u>AAA</u> | | <u>A2</u> | | Rated | | |
| Corporate stocks | \$ | 8,705 | \$ | - | \$ | - | \$ | 8,705 | | |
| Corporate bonds | | 1,317 | | - | | 1,317 | | - | | |
| Certificate of deposit | | 9,012 | | - | | - | | 9,012 | | |
| Mutual funds | | 2,727 | | - | | - | | 2,727 | | |
| US Treasury notes | | 438 | | 438 | | - | | | | |
| Federal agency securities | _ | 3,101 | | 3,101 | | - | | - | | |
| Total investments | \$_ | 25,300 | \$ | 3,539 | \$ | 1,317 | \$ | 20,444 | | |

Massachusetts General Law, Chapter 32, Section 23, limits the investment of System funds, to the extent not required for current disbursements, in the PRIT Fund or in securities, other than mortgages or collateral loans, which are legal for the investment of funds in savings banks under the laws of the Commonwealth, provided that no more than the established percentage of assets, is invested in any one security.

At December 31, 2014, the Contributory Retirement System maintained its investments in the State Investment Pool* with a fair value of \$247,837,495. This investment type is not rated.

^{*}Fair value is the same as the value of the pool share. The Pension Reserves Investment Trust was created under Massachusetts General Law, Chapter 32, Section 22, in December 1983. The Pension Reserves Investment Trust is operated under contract with a private investment advisor, approved by the Pension Reserves Investment Management Board. The Pension Reserves Investment Management Board shall choose an investment advisor by requesting proposals from advisors and reviewing such proposals based on criteria adopted under Massachusetts General Law, Chapter 30B.

B. Custodial Credit Risk

The custodial credit risk for investments is the risk that, in the event of the failure of the counterparty (e.g., broker-dealer) to a transaction, a government will not be able to recover the value of its investment or collateral securities that are in the possession of another party. The Town's policy for custodial credit risk is to limit investments to the state investment pool, U.S. Treasury obligations, U.S. Agency obligations, and certificates of deposit. The System does not have policies for custodial credit risk.

The Town's investments were exposed to custodial credit risk because the related securities are uninsured, unregistered, and/or held by the Town's brokerage firm, which is also the Counterparty to these securities. The Town manages this custodial credit risk with SIPC and excess SIPC. The System's investments were exposed to custodial credit risk as uninsured and uncollateralized. However, these investments were held in the State Investment Pool.

C. Concentration of Credit Risk

The Town's policy for concentration of credit risk is to limit investments in a single financial institution to no more than 10% of the Town's investments with the exception of U.S. Treasury obligations or investments fully collateralized by U.S. Treasuries or agencies, and state pools.

The Town's investments in any one issuer (other than U.S. Treasury securities and mutual funds) that represent 5% or more of total investments, was \$1,702,209 held in Federal Home Loan Mortgage notes and \$1,399,449 held in Federal Home Loan Bank notes.

Massachusetts General Law Chapter 32, Section 23 limits the amount the System may invest in any one issuer or security type, with the exception of the PRIT Fund.

The Contributory Retirement System does not have an investment in one issuer greater than 5% of total investments.

D. Interest Rate Risk

Interest rate risk is the risk that changes in market interest rates will adversely affect the fair value of an investment. Generally, the longer the maturity of an investment, the greater the sensitivity of its fair value to changes in market interest rates. The Town's policy for interest rate risk is to structure the portfolio so securities mature to meet all operating requirements that may be reasonably anticipated, thus avoiding the need to sell securities on the open market prior to maturity. The System does not have a formal investment policy that limits investment maturities as a

means of managing its exposure to fair value losses arising from increasing interest rates.

Information about the sensitivity of the fair values of the Town's investments to market interest rate fluctuations is as follows (in thousands):

| | | | | Investment Maturities (in years) | | | | |
|---------------------------|-----|--------------|----|--|----|------------|--|--|
| | | Fair | • | Less | | | | |
| Investment Type | | <u>Value</u> | | Than 1 | | <u>1-5</u> | | |
| Debt-related Securities: | | | | | | | | |
| Corporate bonds | \$ | 1,317 | \$ | 506 | \$ | 811 | | |
| Certificate of deposit | | 9,012 | | 3,623 | | 5,389 | | |
| US Treasury notes | | 438 | | - | | 438 | | |
| Federal agency securities | _ | 3,101 | | - | | 3,101 | | |
| Total | \$_ | 13,868 | \$ | 4,129 | \$ | 9,739 | | |

The Retirement system does not maintain investments that are sensitive to market interest rate fluctuations.

E. Foreign Currency Risk

Foreign currency risk is the risk that changes in foreign exchange rates will adversely affect the fair value of an investment. The Town and System do not have policies for foreign currency risk.

5. Taxes Receivable

Real estate and personal property taxes are levied and based on values assessed on January 1st of every year. Assessed values are established by the Board of Assessor's for 100% of the estimated fair market value. Taxes are due on a quarterly basis and are subject to penalties and interest if they are not paid by the respective due date. Real estate and personal property taxes levied are recorded as receivables in the fiscal year they relate to.

Fourteen days after the due date for the final tax bill for real estate taxes, a demand notice may be sent to the delinquent taxpayer. Fourteen days after the demand notice has been sent, the tax collector may proceed to file a lien against the delinquent taxpayers' property. The Town has an ultimate right to foreclose on property for unpaid taxes. Personal property taxes cannot be secured through the lien process.

Taxes receivable at June 30, 2015 consist of the following (in thousands):

| Real Estate | | | |
|-------------------|-------------|----|-------|
| 2015 | \$ 2,508 | | |
| 2014 | 36 | | |
| 2013 | 21 | | |
| 2012 | 25 | | |
| Prior | 35 | | |
| | | | 2,625 |
| Personal Property | | | |
| 2015 | 102 | | |
| 2014 | 20 | | |
| 2013 | 18 | | |
| 2012 | 20 | | |
| Prior | 338 | | |
| | | | 498 |
| Tax Liens | | | 2,110 |
| Deferred Taxes | | _ | 584 |
| Total | | \$ | 5,817 |

6. Allowance for Doubtful Accounts

The receivables reported in the accompanying entity-wide financial statements reflect the following estimated allowances for doubtful accounts (in thousands):

| | <u>Governmental</u> | Business-Type | | | | | |
|----------------|---------------------|---------------|--|--|--|--|--|
| Property taxes | \$ 1,628 | \$ - | | | | | |
| Excises | \$ 1,771 | \$ - | | | | | |
| Utilities | \$ - | \$ 121 | | | | | |

7. Intergovernmental Receivables

This balance represents reimbursements requested from Federal and State agencies for expenditures incurred in fiscal 2015, as well as funding to be provided by the Massachusetts School Building Authority for reimbursement of approved school capital project expenditures.

8. <u>Interfund Fund Transfers</u>

The Town reports interfund transfers between many of its funds. The sum of all transfers presented in the table agrees with the sum of interfund transfers

presented in the governmental and proprietary fund financial statements. The following is an analysis of interfund transfers made in fiscal year 2015:

| | | Transfers In |] | Transfers Out | | <u>Net</u> |
|--|-----|----------------------|-----|--------------------|-----|----------------------|
| Governmental Funds: General Fund Nonmajor Governmental Funds | \$_ | 2,994,760 395,384 | \$_ | 395,384 106,270 | \$ | 2,599,376 289,114 |
| Subtotal - Governmental | | 3,390,144 | | 501,654 | | 2,888,490 |
| Proprietary Funds: | | | | | | |
| Water Enterprise Fund | | - | | 1,499,362 | | (1,499,362) |
| Sewer Enterprise Fund | _ | - | _ | 1,389,128 | _ | (1,389,128) |
| Subtotal - Proprietary | _ | - | _ | 2,888,490 | _ | (2,888,490) |
| Total | \$_ | 3,390,144 | \$_ | 3,390,144 | \$_ | - |

Transfers to the General Fund from the Water and Sewer funds are to cover indirect costs incurred by the General Fund.

9. Capital Assets

Capital asset activity for the year ended June 30, 2015 was as follows (in thousands):

| | Beginning | | | | | | Ending |
|--|-----------|----------------|----|------------------|----|------------------|----------------|
| | | <u>Balance</u> | _ | <u>Increases</u> | | <u>Decreases</u> | <u>Balance</u> |
| Governmental Activities: | | | | | | | |

| Business-type activities capital assets, net | \$ | 197,385 | \$ | 5,866 | \$ | - | \$ | 203,251 |

Depreciation expense was charged to functions of the Town as follows (in thousands):

| Governmental Activities: | | | |
|---|-------------|--------|--|
| General government | \$ | 1,193 | |
| Public safety | | 1,440 | |
| Education | | 5,182 | |
| Public works | | 4,288 | |
| Health and human services | | 124 | |
| Culture and recreation | _ | 1,012 | |
| Total depreciation expense - governmental activities | \$ <u>_</u> | 13,239 | |
| Business-Type Activities: | | | |
| Water | \$ | 2,621 | |
| Sewer | _ | 7,079 | |
| Total depreciation expense - business-type activities | \$_ | 9,700 | |
| | | | |

10. <u>Deferred Outflows of Resources</u>

Deferred outflows of resources represent the consumption of net assets by the Town that is applicable to future reporting periods. Deferred outflows of resources have a positive effect on net position, similar to assets.

The following is a summary of deferred outflow of resources balances as of June 30, 2015 (in thousands):

| | | Entity-wid | le Basis | Fund Basis | | | | |
|--|-------|-------------------|---|------------|--------------|------------|--|--|
| | Go | overnmental | Business-type | | Proprie | tary Funds | | |
| | | <u>Activities</u> | <u>Activities</u> | | <u>Water</u> | Sewer | | |
| Loss on refunding | \$ | 351 | \$ - | \$ | - | \$ - | | |
| Net difference between projected and actual pension investment | | | | | | | | |
| earnings | | 440 | 9 | _ | 5 | 4 | | |
| Tot | al \$ | S <u>791</u> | \$ <u> 9 </u> | \$_ | 5 | \$4_ | | |

11. Warrants and Accounts Payable

Warrants payable represent 2015 expenditures paid by July 15, 2015. Accounts payable represent additional 2015 expenditures paid after July 15, 2015.

12. Tax Refunds Payable

This balance consists of an estimate of refunds due to property taxpayers for potential abatements. These cases are currently pending with the state Appellate Tax Board.

13. Anticipation Notes Payable

The Town had the following notes outstanding at June 30, 2015:

| | Interest <u>Rate</u> | Date of <u>Issue</u> | Date of <u>Maturity</u> | | Balance at <u>6/30/15</u> |
|----------------------|-------------------------|-------------------------|----------------------------|-----|---------------------------|
| Bond anticipation | 1.00% | 12/12/14 | 12/11/15 | \$ | 20,967,117 |
| Bond anticipation | 0.50% | 06/26/15 | 12/11/15 | | 17,281,057 |
| | | | project | | |
| State revolving loan | 0.00% | 11/08/12 | completion | | 133,266 |
| | | | project | | |
| State revolving loan | 0.11% | 03/31/14 | completion | _ | 2,175,442 |
| Total | | | | \$_ | 40,556,882 |

The following summarizes activity in notes payable during fiscal year 2015:

| | Balance Beginning <u>of Year</u> | New <u>Issues</u> | | <u>Maturities</u> | Balance End of <u>Year</u> |
|----------------------|--|----------------------|----|-------------------|----------------------------------|
| Bond anticipation | \$ 27,478,989 | \$ - | \$ | (27,478,989) | \$ - |
| Bond anticipation | 12,379,410 | - | | (12,379,410) | - |
| Bond anticipation | - | 20,967,117 | | - | 20,967,117 |

B. Future Debt Service

The annual payments to retire all general obligation long-term debt outstanding as of June 30, 2015 are as follows:

| Governmental | | <u>Principal</u> | <u>Interest</u> | | <u>Total</u> |
|--------------|-----|------------------|------------------|-----|--------------|
| 2016 | \$ | 8,178,331 | \$ 2,059,723 | \$ | 10,238,054 |
| 2017 | | 7,527,622 | 1,740,132 | | 9,267,754 |
| 2018 | | 6,683,094 | 1,462,505 | | 8,145,599 |
| 2019 | | 5,579,377 | 1,204,514 | | 6,783,891 |
| 2020 | | 4,250,972 | 983,490 | | 5,234,462 |
| 2021 - 2025 | | 14,441,720 | 2,746,832 | | 17,188,552 |
| 2026 - 2030 | | 6,212,847 | 621,227 | | 6,834,074 |
| 2031 - 2035 | _ | 958,500 | 57,905 | | 1,016,405 |
| Total | \$_ | 53,832,463 | \$ 10,876,328 | \$_ | 64,708,791 |

The general fund has been designated as the source to repay the governmental-type general obligation debt outstanding as of June 30, 2015.

| Business-Type | | <u>Principal</u> | <u>Interest</u> | <u>Total</u> | | | |
|---------------|----|------------------|------------------|-------------------|--|--|--|
| 2016 | \$ | 8,095,580 | \$ 3,610,765 | \$ 11,706,345 | | | |
| 2017 | | 7,777,784 | 3,378,891 | 11,156,675 | | | |
| 2018 | | 7,676,157 | 3,150,624 | 10,826,781 | | | |

| Total | \$ | 116,972,844 |

D. Overlapping Debt

The Town's proportionate share of debt of other governmental units which provide services within the Town's boundaries, and which must be borne by the resources of the Town, is summarized below (in thousands and unaudited):

| | | l | l own's | | | | | |
|----------------|------------------|-------|---------|---------|--|--|--|--|
| Related Entity | <u>Principal</u> | ated | d Share | | | | | |
| MWRA - Water | \$ 2,101,091 | 3.64% | \$ | 76,480 | | | | |
| MWRA - Sewer | \$ 3,797,261 | 2.88% | | 109,361 | | | | |
| MBTA and MWRTA | \$ 5,634,750 | 0.27% | _ | 15,214 | | | | |
| | | | \$_ | 201,055 | | | | |

E. Legal Debt Margin

The Town is subject to the General Laws of the Commonwealth of Massachusetts which, in general, limits the amount of bonded debt the Town may have outstanding to 5 percent of the valuation of taxable property as last equalized by the Commonwealth's Department of Revenue. The following is a computation of the legal debt margin as of June 30, 2015 (in thousands):

| Revised equalized valuation - FY2014 | \$ | 7,611,238 |
|---|---------------------|-----------|
| Debt limit - 5% of equalized valuation | \$ | 380,562 |
| Total debt outstanding Less: debt exempt from limit | 179,228 (80,854) | 98,374 |
| Legal Debt Margin | \$ | 282,188 * |

^{*} Excludes bond anticipation notes and authorized but unissued det

F. Changes in General Long-Term Liabilities

During the year ended June 30, 2015, the following changes occurred in long-term liabilities (in thousands):

| | Total Balance 7/1/14 | F | Additions | R | eductions | Total Balance 6/30/15 | | Less Current Portion | | Equals ong-Term Portion <u>6/30/15</u> |
|---------------------------|----------------------------|----|-----------|----|-----------|-----------------------------|----|----------------------------|----|---|

| Totals | \$ | 120,510 | \$ | 23,351 | \$_ | (8,360) | \$ 135,501 | \$ | (8,489) | \$ | 127,012 |

15. Deferred Inflows of Resources

Deferred inflows of resources are the acquisition of net assets by the Town that are applicable to future reporting periods. Deferred inflows of resources have a negative effect on net position, similar to liabilities.

The following is a summary of deferred inflow of resources balances as of June 30, 2015 (in thousands):

| | Entity-wide Basis | | | | Fund Ba | | | | asis | | | |
|----------------------|----------------------------|-----------|----------|--------------------|-----------|------------|-------------------|-------------------|------|--------------|----|--------------|
| | Governmental Business-type | | - | Governmental Funds | | | | Proprietary Funds | | | | |
| | <u>A</u> | ctivities | <u>A</u> | <u>ctivities</u> | <u>Ge</u> | neral Fund | <u>1</u> <u>k</u> | <u>lonmajo</u> | • | <u>Water</u> | | <u>Sewer</u> |
| Unavailable revenues | \$ | - | \$ | - | \$ | 7,992 | \$ | 3,714 | \$ | - | \$ | - |
| Gain on refunding | _ | 279 | _ | 252 | _ | | | | | 233 | | 19 |
| Tota | al \$ | 279 | \$ | 252 | \$ | 7,992 | \$ | 3,714 | \$ | 233 | \$ | 19 |

16. Restricted Net Position

The accompanying entity-wide financial statements report restricted net position when external constraints from grantors or contributors are placed on net position.

Permanent fund restricted net position is segregated between nonexpendable and expendable. The nonexpendable portion represents the original restricted principal contribution, and the expendable represents accumulated earnings which are available to be spent based on donor restrictions.

17. Governmental Funds - Balances

Fund balances are segregated to account for resources that are either not available for expenditure in the future or are legally set aside for a specific future use.

The Town implemented GASB Statement No. 54 (GASB 54), Fund Balance Reporting and Governmental Fund Type Definitions, which enhances the usefulness of fund balance information by providing clearer fund balance classifications that can be more consistently applied and by clarifying existing governmental fund type definitions.

The following types of fund balances are reported at June 30, 2015:

Nonspendable - Represents amounts that cannot be spent because they are either (a) not in spendable form or (b) legally or contractually required to be maintained intact. This fund balance classification includes general fund reserves for prepaid expenditures, petty cash, and nonmajor governmental fund reserves for the principal portion of permanent trust funds.

Restricted - Represents amounts that are restricted to specific purposes by constraints imposed by creditors, grantors, contributors, or laws or regulations of other governments, or constraints imposed by law through constitutional provisions or enabling legislation. This fund balance classification includes general fund encumbrances funded by bond issuances, various special revenue funds, and the income portion of permanent trust funds.

<u>Committed</u> - Represents amounts that can only be used for specific purposes pursuant to constraints imposed by formal action of the Town's highest level of decision-making authority. This fund balance classification includes general fund encumbrances for non-lapsing, special article appropriations approved at Town Meeting, stabilization funds set aside by Town Meeting vote for future capital acquisitions and improvements (now reported as part of the general fund per GASB 54), and various special revenue funds.

<u>Assigned</u> - Represents amounts that are constrained by the Town's intent to use these resources for a specific purpose. This fund balance classification includes general fund encumbrances that have been established by various Town departments for the expenditure of current year budgetary financial resources upon vendor performance in the subsequent budgetary period.

<u>Unassigned</u> - Represents amounts that are available to be spent in future periods.

Following is a breakdown of the Town's fund balances at June 30, 2015:

| | | General Fund | Nonmajor Governmental Funds | | Total Governmental Funds |
|------------------------------------|-----|-----------------|-----------------------------------|----|--------------------------------|
| Nonspendable | | <u> </u> | | | |
| Prepaid expenditures Petty cash | \$ | 72,980 550 | \$ - | \$ | 72,980 550 |
| Nonexpendable permanent funds | | - | 585,195 | | 585,195 |

| Total Unassigned | _ | 20,971,228 | (15,021,667) | - | 5,949,561 |
| Total Fund Balance | \$_ | 36,456,820 | \$ (671,029) | \$ | 35,785,791 |

⁽¹⁾ Includes General Stabilization fund balance of \$13,585,084.

18. General Fund Unassigned Fund Balance

The unassigned general fund balance reported on the balance sheet is stated in accordance with generally accepted accounting principles (GAAP), which differs in certain respects from the Massachusetts Uniform Municipal Accounting System (UMAS). The following paragraphs summarize the major differences.

Massachusetts General Laws include provisions to allow municipalities to overexpend certain appropriations if they are incurred in an emergency situation and for the safety of the public. The most common example involves the "snow and ice" appropriation. All such overexpenditures, however, must be funded in the subsequent year's tax rate.

The accompanying financial statements include an estimate for future potential tax refunds, which is not recognized under UMAS.

The following summarizes the specific differences between GAAP basis and budgetary basis of reporting the general fund unassigned fund balance:

| Unassigned GAAP basis balance | \$ | 20,971,228 |
|-------------------------------|-----|--------------|
| Less: General Stabilization | | (13,585,084) |
| Tax refund estimate | | 4,556,165 |
| Statutory (UMAS) Balance | \$_ | 11,942,309 |

19. Subsequent Events

Debt

Subsequent to June 30, 2015, the Town has incurred the following additional debt:

| | <u>Amount</u> | Interest <u>Rate</u> | Issue <u>Date</u> | Maturity <u>Date</u> |
|------------------------|------------------|-------------------------|----------------------|-------------------------|
| General obligation | \$ 43,668,000 | 3.00-5.00% | 12/10/15 | 11/01/40 |
| Bond anticipation note | \$ 4,417,913 | 0.75% | 12/11/15 | 12/09/16 |

20. <u>Commitments and Contingencies</u>

<u>Outstanding Legal Issues</u> - There are several pending legal issues in which the Town is involved. The Town's management is of the opinion that the potential future settlement of such claims would not materially affect its financial statements taken as a whole.

<u>Grants</u> - Amounts received or receivable from grantor agencies are subject to audit and adjustment by grantor agencies, principally the federal government. Any disallowed claims, including amounts already collected, may constitute a liability of the applicable funds. The amount of expenditures which may be disallowed by the grantor cannot be determined at this time, although the Town expects such amounts, if any, to be immaterial.

<u>Abatements</u> - There are several cases pending before the Appellate Tax Board in regard to alleged discrepancies in property assessments. According to the Town's counsel, the probable outcome of these cases at the present time is indeterminable.

21. Post-Employment Healthcare and Life Insurance Benefits

Other Post-Employment Benefits

GASB Statement 45, Accounting and Financial Reporting by Employers for Post-Employment Benefits Other Than Pensions, requires governments to account for other post-employment benefits (OPEB), primarily healthcare, on an accrual basis rather than on a pay-as-you-go basis. The effect is the recognition of an actuarially required contribution as an expense on the Statement of Activities when a future retiree earns their post-employment benefits, rather than when they use their post-employment benefit. To the extent that an entity does not fund their actuarially required contribution, a post-employment benefit liability is recognized on the Statement of Net Position over time.

A. Plan Description

In addition to providing the pension benefits described, the Town provides post-employment healthcare and life insurance benefits for retired employees through the Town's plan. The benefits, benefit levels, employee contributions and employer contributions are governed by Chapter 32 of the Massachusetts General Laws. As of July 1, 2014, the actuarial valuation date, approximately 1,495 retirees and 1,695 active employees meet the eligibility requirements. The plan does not issue a separate financial report.

B. Benefits Provided

The Town provides medical, prescription drug, mental health/substance abuse and life insurance to retirees and their covered dependents. All active employees who retire from the Town and meet the eligibility criteria will receive these benefits.

C. Funding Policy

Retirees contribute various percentages of the cost of the health plan, as determined by the Town. The Town contributes the remainder of the health plan costs on a pay-as-you-go basis.

D. Annual OPEB Costs and Net OPEB Obligation

The Town's fiscal 2015 annual OPEB expense is calculated based on the annual required contribution of the employer (ARC), an amount actuarially determined in accordance with the parameters of GASB Statement No. 45. The ARC represents a level of funding that, if paid on an ongoing basis, is projected to cover the normal cost per year and amortize the unfunded actuarial liability over a period of thirty years. The following table shows the components of the Town's annual OPEB cost for the year ending June 30, 2015, the amount actually contributed to the plan, and the change in the Town's net OPEB obligation based on an actuarial valuation as of July 1, 2014.

| Annual Required Contribution (ARC) | \$ | 21,976,575 |
|---|-----|--------------|
| Interest on net OPEB obligation | | 3,761,441 |
| Adjustment to ARC | _ | (3,390,312) |
| Annual OPEB cost | | 22,347,704 |
| Contributions made | _ | (12,898,678) |
| Increase in net OPEB obligation | | 9,449,026 |
| Net OPEB obligation - beginning of year | _ | 94,036,071 |
| Net OPEB obligation - end of year | \$_ | 103,485,097 |

The Town's annual OPEB cost, the percentage of annual OPEB cost contributed to the plan, and the net OPEB obligation were as follows:

| | Annual ODED | Percentage of OPEB | Not ODED |
|-------------------|---------------|-----------------------|-------------------|
| Figaal Voor Endad | Annual OPEB | _ | Net OPEB |
| Fiscal Year Ended | Cost | Cost Contributed | Obligation |
| 2015 | \$ 22,347,704 | 57.7% | \$ 103,485,097 |
| 2014 | \$ 22,838,955 | 53.5% | \$ 94,036,071 |
| 2013 | \$ 22,589,477 | 57.1% | \$ 83,421,437 |
| 2012 | \$ 27,009,304 | 41.6% | \$ 73,728,050 |
| 2011 | \$ 25,300,181 | 41.4% | \$ 57,944,179 |
| 2010 | \$ 27,798,877 | 46.9% | \$ 43,126,429 |
| 2009 | \$ 26,539,476 | 45.9% | \$ 28,365,978 |
| 2008 | \$ 25,839,476 | 45.8% | \$ 14,007,989 |

E. Funded Status and Funding Progress

The funded status of the plan as of July 1, 2014, the date of the most recent actuarial valuation was as follows:

| Actuarial accrued liability (AAL) | \$ | 288,645,545 |
|---|-----|-------------|
| Actuarial value of plan assets (7/1/14) | _ | (2,516,635) |
| Unfunded actuarial accrued liability (UAAL) | \$_ | 286,128,910 |
| Funded ratio (actuarial value of plan assets/AAL) | _ | 0.9% |
| Covered payroll (active plan members) | \$ | 111,670,636 |
| UAAL as a percentage of covered payroll | | 256% |

Actuarial valuations of an ongoing plan involve estimates of the value of reported amount and assumptions about the probability of occurrence of events far into the future. Examples included assumptions about future employment, mortality, and the healthcare cost trend. Amounts determined regarding the funded status of the plan and the annual required contributions of the employer are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future. The schedule of funding progress, presented as required supplementary information following the notes to the financial statements, presents multiyear trend information that shows whether the actuarial value of plan assets is increasing or decreasing over time relative to the actuarial accrued liabilities for benefits.

F. Actuarial Methods and Assumptions

Projections of benefits for financial reporting purposes are based on the plan as understood by the Town and the plan members and include the types of benefits provided at the time of each valuation and the historical pattern of sharing of benefit costs between the Town and plan members to that point. The actuarial methods and assumptions used include techniques that are designed to reduce short-term volatility in actuarial accrued liabilities and the actuarial value of assets, consistent with the long-term perspective of the calculations.

In the July 1, 2014 actuarial valuation the projected unit credit cost method was used. The actuarial value of assets was not determined as the Town has not advance funded its obligation. The actuarial assumptions included a 4% investment rate of return and an initial annual healthcare cost trend rate of 8% which decreases to a 5% long-term rate for all healthcare benefits after five years. The amortization costs for the initial UAAL is a level percentage of payroll for a period of 30 years, on an open basis. This has been calculated assuming the amortization payment increases at a rate of 4.0%.

22. Retirement System

The Town follows the provisions of GASB Statement No. 67 Financial Reporting for Pension Plans – an amendment of GASB Statement No. 25 and GASB Statement No. 68, Accounting and Financial Reporting for Pensions – an amendment of GASB Statement No. 27, with respect to the employees' retirement funds.

A. Plan Description

The System is a member of the Massachusetts Contributory Retirement Systems and is governed by Chapter 32 of the Massachusetts General Laws. Because of the significance of its operational and financial relationship with the Town, the System is included as a pension trust fund in the Town's basic financial systems.

Substantially all employees of the Town (except teachers and administrators under contract employed by the School Department), the Framingham Housing Authority, and MetroWest Regional Transit are members of the Framingham Contributory Retirement System (the System), a cost sharing, multiple employer public employee retirement system (PERS). Eligible employees must participate in the System. The pension plan provides pension benefits, deferred allowances, and death and disability benefits. Chapter 32 of the Massachusetts General Laws establishes the authority of the System, contribution percentages and benefits paid.

The System is governed by a five-member board. The five members include two appointed by the town, two elected by the members and retirees, and a fifth member chosen by the other four members with the approval of the Public Employee Retirement Administration Commission. The System Retirement Board does not have the authority to amend benefit provisions.

Membership of each plan consisted of the following at June 30, 2015:

| Retirees and beneficiaries receiving benefits | 806 |
|---|-------|
| Terminated plan members entitled to but not yet | |
| receiving benefits | 246 |
| Active plan members | 1,110 |
| Total | 2,162 |
| Number of participating employers | 3 |

B. Benefits Provided

The System provides for retirement allowance benefits up to a maximum of 80% of a member's highest three-year average annual rate of regular compensation for those hired prior to April 2, 2012 and the highest five year average for those first becoming members of the MA System on or after that date. Benefit payments are based upon a member's age, length

of creditable service, level of compensation and group classification. Members become vested after 10 years of creditable service. A retirement allowance may be received upon attaining 20 years of service. The plan also provides for retirement at age 55 if the participant (1) has a record of 10 years of creditable service, (2) was on the Town/City payroll on January 1, 1978, (3) voluntarily left Town/City employment on or after that date, and (4) left accumulated annuity deductions in the fund. A participant who became a member on or after April 2, 2012 is eligible for a retirement allowance upon 10 years creditable service and reaching ages 60 or 50 for groups 1 and 2, respectively. A retirement allowance consists of two parts: an annuity and a pension. A member's accumulated total deductions and a portion of the interest they generate constitute the annuity. The difference between the total retirement allowance and the annuity is the pension. The average retirement benefit is approximately 80-85% pension and 15-20% annuity.

Per Chapter 176 of the Acts of 2011, for members who retire on or after April 2, 2012, if in the 5 years of creditable service immediately preceding retirement, the difference in the annual rate of regular compensation between any 2 consecutive years exceeds 100 percent, the normal yearly amount of the retirement allowance shall be based on the average annual rate of regular compensation received by the member during the period of 5 consecutive years preceding retirement.

Employees who resign from service and who are not eligible to receive a retirement allowance or are under the age of 55 are entitled to request a refund of their accumulated total deductions. In addition, depending upon the number of years of creditable service, such employees are entitled to receive zero, fifty, or one hundred percent of the regular interest which has accrued upon those deductions. However, effective July 1, 2010, members voluntarily withdrawing with less than 10 years of service get credited interest each year at a rate of 3% and do not forfeit any interest previously earned on contributions.

C. Contributions

Participants contribute a set percentage of their gross regular compensation annually. Employee contribution percentages are specified in Chapter 32 of the Massachusetts General Laws. The employee's individual contribution percentage is determined by their date of entry into the system. In addition, all employees hired after January 1, 1979 contribute an additional 2% on all gross regular compensation over the rate of \$30,000 per year. The percentages are as follows:

| Before January 1, 1975 | 5% |
|-------------------------------------|----|
| January 1, 1975 - December 31, 1983 | 7% |
| January 1, 1984 - June 30, 1996 | 8% |
| Beginning July 1, 1996 | 9% |

Employers are required to contribute at actuarially determined rates as accepted by the Public Employee Retirement Administration Commission (PERAC).

The Town's contribution to the System for the year ended June 30, 2015 was \$11,806,955 which was equal to its annual required contribution.

D. Summary of Significant Accounting Policies

The accounting policies of the System as reflected in the accompanying financial statements for the year ended June 30, 2015 conform to generally accepted accounting principles for public employee retirement systems (PERS). The more significant accounting policies of the System are summarized below:

Basis of Accounting - Contributory retirement system financial statements are prepared using the accrual basis of accounting. Plan member contributions are recognized as revenue in the period in which the members provide services to the employer. Employer contributions are recognized when due and the employer has made a formal commitment to provide the contributions. Benefits and refunds are recognized when due and payable in accordance with the terms of the plan.

<u>Investments</u>

Investment Policy

Investments are reported at fair value in accordance with PERAC requirements. System assets are managed on a total return basis with a long-term objective of achieving and maintaining a fully funded status for the benefits provided through the pension plan.

Rate of Return

For the year ended June 30, 2015, the annual money-weighted rate of return on pension plan investments, net of pension plan investment expenses, was 7.69%. The money-weighted rate of return expresses investment performance, net of investment expense, adjusted for the changing amounts actually invested.

Net Pension Liability

For purposes of measuring the net pension liability, deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the fiduciary net position of the System and additions to/deductions from System's fiduciary net position have been determined on the same basis as they are reported by System. For this purpose, benefit payments (including refunds of employee

contributions) are recognized when due and payable in accordance with benefit terms. Investments are reported at fair value.

E. Net Pension Liability of Participating Employers

The components of the net pension liability of the participating employers at June 30, 2015 were as follows (in thousands):

Net Pension Liability of Employers

| Total pension liability | \$ | 352,291 |
|---------------------------------------|-----|-----------|
| Plan fiduciary net position | _ | (259,127) |
| Employers' net pension liability | \$_ | 93,164 |
| Plan fiduciary net postion as a | | |
| percentage of total pension liability | | 73.6% |

Actuarial Assumptions

A summary of the actuarial assumptions as of the latest actuarial valuation is shown below:

| | January 1, 2014 rolled forward to |
|----------------------------|-----------------------------------|
| Valuation Date | December 31, 2014 |
| Actuarial cost method | Entry Age |
| Actuarial assumptions: | , - |
| Investment rate of return | 7.75% |
| Projected salary increases | 4.25% for Group 1 and 4.75% for |
| • | Group 4 |
| · · · | * |

Inflation rate
Post-retirement cost-of-living adjustment
Not explicitly assumed
3% on first \$12,000

Actuarial valuation of the ongoing Systems involves estimates of the reported amounts and assumptions about probability of occurrence of events far into the future. Examples include assumptions about future employment mortality and future salary increases. Amounts determined regarding the net pension liability are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future. The actuarial assumptions used in the December 31, 2014 valuation were based on the results of the most recent actuarial experience study, dated January 1, 2014, which was for the period January 1, 2013 through December 31, 2013.

Mortality rates were based on pre-retirement rates that reflect the RP-2000 Employees table projected 22 years with Scale AA (gender distinct). Post retirement rates reflect the RP-200 Healthy Annuitant table projected

17 years with Scale AA (gender distinct). For disabled retirees, this table is set forward 3 years for males.

Target Allocations

The long-term expected rate of return on pension plan investments was selected from a best estimate range determined using the building block approach. Under this method, an expected future real return range (expected returns, net of pension plan investment expense and inflation) is calculated separately for each asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return net of investment expenses by the target asset allocation percentage and by adding expected inflation. The target allocation and best estimates of arithmetic real rates of return for each major class are summarized in the following table:

| Asset Class | Target Asset <u>Allocation</u> | Expected Real Rate of Return |
|---------------------------------|--------------------------------------|------------------------------------|
| Domestic equity | 18.0% | 7.9% |
| International equity | 22.0% | 8.9% |
| Fixed Income | 19.0% | 5.9% |
| Private equity | 10.0% | 9.8% |
| Real estate | 10.0% | 6.5% |
| Timber/Natural Resources | 4.0% | 6.9% |
| Hedge Funds | 9.0% | 7.0% |
| Private Debt | 4.0% | 8.3% |
| Portfolio Completion Strategies | 4.0% | N/A |

<u>Discount Rate</u>: The discount rate used to measure the total pension liability was 7.75%. The projection of cash flows used to determine the discount rate assumed that the plan member contributions will be made at the current contribution rate and that employer contributions will be made at contractually required rates, actuarially determined. Based on those assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments to current active and inactive plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

<u>Sensitivity of the proportionate share of the net pension liability to changes in the discount rate</u>: The following presents the Town's proportionate share of the net pension liability calculated using the discount rate of 7.75 percent, as well as what the Town's proportionate share of the net pension liability would be if it were calculated using a discount rate that is

1 percentage-point lower (6.75%) or 1 percentage-point higher (8.75%) than the current rate (in thousands):

| | | | Current | |
|-------------------|---------------|----|----------|--------------|
| | 1% | | Discount | 1% |
| | Decrease | | Rate | Increase |
| Fiscal Year Ended | (6.75%) | _ | (7.75%) | (8.75%) |
| June 30, 2015 | \$ 124.941 | \$ | 88.609 | \$ 57.254 |

F. <u>Pension Liabilities, Pension Expense, and Deferred Outflows of</u> Resources and Deferred Inflows of Resources Related to Pensions

At June 30, 2015, the Town reported a liability of \$88,609,000 for its proportionate share of the net pension liability. The net pension liability was measured as of December 31, 2014, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of January 1, 2014. The Town's proportion of the net pension liability was based on a projection of the Town's long-term share of contributions to the pension plan relative to the projected contributions of all participating employers, actuarially determined. At December 31, 2014, the Town's proportion was 95.11 percent.

For the year ended June 30, 2015, the Town recognized pension expense of \$9,337,000. In addition, the Town reported deferred outflows of resources related to pensions from the following sources:

| | 0 | Deferred outflows of esources |
|--|-----|-------------------------------------|
| Net difference between projected and actual earnings on pension plan investments | \$ | 449,000 |
| Total | \$_ | 449,000 |

Amounts reported as deferred outflows of resources related to pensions will be recognized in pension expense as follows:

| 2016 | | \$ | 112,250 |
|------|-------|-----|---------|
| 2017 | | | 112,250 |
| 2018 | | | 112,250 |
| 2019 | | _ | 112,250 |
| | Total | \$_ | 449,000 |

Year ended June 30:

23. Massachusetts Teachers' Retirement System (MTRS)

A. Plan Description

The Massachusetts Teachers' Retirement System (MTRS) is a public employee retirement system (PERS) that administers a cost-sharing multi-employer defined benefit plan, as defined in Governmental Accounting Standards Board (GASB) Statement No. 67, Financial Reporting for Pension Plans. MTRS is managed by the Commonwealth on behalf of municipal teachers and municipal teacher retirees. The Commonwealth is a nonemployer contributor and is responsible for all contributions and future benefit requirements of the MTRS. The MTRS covers certified teachers in cities (except Boston), towns, regional school districts, charter schools, educational collaboratives, and Quincy College. The MTRS is part of the Commonwealth's reporting entity and does not issue a standalone audited financial report.

Management of MTRS is vested in the Massachusetts Teachers' Retirement Board (MTRB), which consists of seven members—two elected by the MTRS members, one who is chosen by the six other MTRB members, the State Treasurer (or their designee), the State Auditor (or their designee), a member appointed by the Governor, and the Commissioner of Education (or their designee), who serves ex-officio as the Chairman of the MTRB.

B. Benefits Provided

MTRS provides retirement, disability, survivor, and death benefits to members and their beneficiaries. Massachusetts General Laws (MGL) establishes uniform benefit and contribution requirements for all contributory PERS. These requirements provide for superannuation retirement allowance benefits up to a maximum of 80% of a member's highest three-year average annual rate of regular compensation. For employees hired after April 1, 2012, retirement allowances are calculated on the basis of the last five years or any five consecutive years, whichever is greater in terms of compensation. Benefit payments are based upon a member's age, length of creditable service, and group creditable service, and group classification. The authority for amending these provisions rests with the Legislature.

Members become vested after ten years of creditable service. A superannuation retirement allowance may be received upon the completion of twenty years of creditable service or upon reaching the age of 55 with ten years of service. Normal retirement for most employees occurs at age 65. Most employees who joined the system after April 1, 2012 cannot retire prior to age 60.

The MTRS' funding policies have been established by Chapter 32 of the MGL. The Legislature has the authority to amend these policies. The annuity portion of the MTRS retirement allowance is funded by employees, who contribute a percentage of their regular compensation. Costs of administering the plan are funded out of plan assets.

C. Contributions

Member contributions for MTRS vary depending on the most recent date of membership:

| Hire Date | % of Compensation |
|---------------------|---|
| Prior to 1975 | 5% of regular compensation |
| 1975 - 1983 | 7% of regular compensation |
| 1984 to 6/30/1996 | 8% of regular compensation |
| 7/1/1996 to present | 9% of regular compensation |
| 7/1/2001 to present | 11% of regular compensation (for teachers hired after 7/1/01 and those accepting provi- |
| | sions of Chapter 114 of the Acts of 2000) |
| 1979 to present | An additional 2% of regular compensation in excess of \$30,000 |

D. Actuarial Assumptions

The total pension liability for the June 30, 2014 measurement date was determined by an actuarial valuation as of January 1, 2014 rolled forward to June 30, 2014. The total pension liability for the June 30, 2013 measurement date was determined by an actuarial valuation as of January 1, 2014, rolled back to June 30, 2013. This valuation used the following assumptions:

- (a) 8.0% investment rate of return, (b) 3.5% interest rate credited to the annuity savings fund and (c) 3.0% cost of living increase per year.
- Salary increases are based on analyses of past experience but range from 4.0% to 7.5% depending on length of service.
- Mortality rates were as follows:
 - Pre-retirement reflects RP-2000 Employees table adjusted for "white-collar" employment projected 22 years with Scale AA (gender distinct)
 - Post-retirement reflects RP-2000 Healthy Annuitant table adjusted for large annuity amounts and projected 17 years with Scale AA (gender distinct)
 - Disability reflects RP-2000 Healthy Annuitant table adjusted for large annuity amounts and projected 17 years with Scale AA (gender distinct) set forward 3 years for males.

Investment assets of the MTRS are with the Pension Reserves Investment Trust (PRIT) Fund. The long-term expected rate of return on pension plan

investments was determined using a building-block method in which bestestimate ranges of expected future rates of return are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future rates of return by the target asset allocation percentage. Best estimates of geometric rates of return for each major asset class included in the PRIT Fund's target asset allocation as of June 30, 2014 and 2013 are summarized in the following table:

| | | Long-Term Expected | | |
|--------------------------|------------|--------------------|-------------|--|
| | Target | Real Rate | of Return | |
| Asset Class | Allocation | <u>2014</u> | <u>2013</u> | |
| Global equity | 43.0% | 7.2% | 7.70% | |
| Core fixed income | 13.0% | 2.5% | 2.00% | |
| Hedge funds | 10.0% | 5.5% | 4.75% | |
| Private equity | 10.0% | 8.8% | 9.00% | |
| Real estate | 10.0% | 6.3% | 6.00% | |
| Value added fixed income | 10.0% | 6.3% | 6.30% | |
| Timber/natural resources | 4.0% | 5.0% | 5.00% | |
| Total | 100.0% | | | |

E. Discount Rate

The discount rate used to measure the total pension liability was 8.0%. The projection of cash flows used to determine the discount rate assumed that plan member contributions will be made at the current contribution rates and the Commonwealth's contributions will be made at rates equal to the difference between actuarially determined contribution rates and the member rates. Based on those assumptions, the net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

F. Sensitivity Analysis

The following illustrates the sensitivity of the collective net pension liability to changes in the discount rate. In particular, the table presents the MTRS collective net pension liability assuming it was calculated using a single discount rate that is one-percentage-point lower or one-percentage-point higher than the current discount rate (amounts in thousands):

| Fiscal Year | 1% Decrease | Current Discount | 1% Increase |
|--------------------------------|--------------------------------|--------------------------------|--------------------------------|
| Ended | to 7% | Rate 8% | to 9% |
| June 30, 2013 June 30, 2014 | \$ 21,426,000 \$ 20,247,000 | \$ 17,234,000 \$ 15,896,000 | \$ 13,672,000 \$ 12,200,000 |

G. Special Funding Situation

The Commonwealth is a nonemployer contributor and is required by statute to make all actuarial determined employer contributions on behalf of the member employers. Therefore, these employers are considered to be in a special funding situation as defined by GASB Statement No. 68, Accounting and Financial Reporting for Pensions (GASB 68) and the Commonwealth is a nonemployer contributing entity in MTRS. Since the employers do not contribute directly to MTRS, there is no net pension liability to recognize for each employer.

H. Town Proportions

In fiscal year 2014 (the most recent measurement period), the Town's proportionate share of the MTRS' collective net pension liability and pension expense was \$164,027,046 and \$11,395,746 respectively, based on a proportionate share of 1.03%. As required by GASB 68, the Town has recognized its portion of the collective pension expense as both a revenue and expense in the government-wide Statement of Activities

24. Self-insurance

The Town self-insures against claims for workers compensation, unemployment and most employee health coverage. Annual estimated requirements for claims are provided in the Town's annual operating budget.

Health Insurance

The Town contracts with an insurance carrier for excess liability coverage and an insurance consultant for claims processing. Under the terms of its insurance coverage, the Town is liable for claims up to \$150,000 per incident, with a maximum lifetime coverage of \$2,000,000. The claims liability represents an estimate of claims incurred but unpaid at year-end, based on past historical costs and claims paid subsequent to year-end.

Changes in the aggregate liability for claims for the year ended June 30, 2015 are as follows:

| | <u>C</u> | Dental Coverage |
|--|----------|--------------------|
| Claims liability, beginning of year | \$ | 4,221,683 |
| Claims incurred/recognized in fiscal year 2015 | | 3,057,414 |
| Claims paid in fiscal year 2015 | _ | (3,611,854) |
| Claims liability, end of year | \$_ | 3,667,243 |

The \$3,667,243 estimated liability for claims incurred but not reported includes only an estimate for known loss events expected to later be presented as claims. The Town is unable to estimate the amount of unknown loss events expected to become claims and expected future developments on claims already reported.

25. Risk Management

The Town is exposed to various risks of loss related to torts; theft of, damage to and destruction of assets; errors and omissions; and natural disasters for which the government carries commercial insurance. There were no significant reductions in insurance coverage from the previous year and have been no material settlements in excess of coverage in any of the past three fiscal years.

26. <u>Beginning Net Position Restatement</u>

The beginning (July 1, 2014) net position of the Town has been restated as follows:

Government-Wide Financial Statements:

| | (| Governmental <u>Activities</u> | | Business-Type Activities |
|--|------|-----------------------------------|-----|-----------------------------|
| As previously reported Implementation of GASB 68 | \$ | 100,628,704 (88,863,178) | \$_ | 74,147,444 (1,859,822) |
| As restated | \$ | 11,765,526 | \$_ | 72,287,622 |
| Fund Basis Financial Stateme | ents | | | |
| | | Water Fund | | Sewer Fund |
| As previously reported Implementation of GASB 68 | \$ | 35,207,778 (1,088,676) | \$_ | 38,939,666 (771,146) |
| As restated | \$ | 34,119,102 | \$_ | 38,168,520 |
| | | Pension Trust Fund | | |
| As previously reported Implementation of GASB 67 | \$ | 237,904,497 5,911,500 | | |
| As restated | \$ | 243,815,997 | | |
| | | | | |
